Memo to File:

RE: Continental Lime, Inc
Proposed Lime Quarry
Sec. 25 & 36, T. 21S., R. 10W.
Millard County, Utah

PRO/ ~~027/006~~
027/006

New file

Mr. Wayne Nixdorf of Continental Lime stopped by the office to discuss the requirements to obtain a mining permit. Ron Daniels, Jim Smith, and Tom Suchoski met with Mr. Nixdorf to answer his questions.

Mr. Nixdorf was given application forms MR-1, MR-2, MR-8 and a short explanation of what they were for and what we would like to see presented. He had maps that showed the area of the proposed operation at present and what the open pit was proposed to look like. The staff indicated that the maps should represent surface structures which are present or proposed.

The mine site will include a crushing plant and will encompass an approximated 150 acres. The proposed production from the open pit operation is expected to approach 600,000 tons per year.

Mr. Nixdorf indicated that he would like to prepare a draft submittal and then meet with the staff to see if it were complete. He expected to be able to have his submittal prepared by mid-June.

THOMAS J. SUCHOSKI *TS*
